

RADIO 4G IS380.M1

ZONE M1 EX

Affordable 4G radio bridges conventional radio systems with modern cellular networks in a seamless way. It runs on i.safe MOBILE's ISM-OS 16 platform, which is based on Android™. The IS380.M1 preserves the classic two-way radio form factor, allowing users to continue working with familiar controls and workflows without any adjustment. With the right applications and network setup, it supports Push-to-Talk over Cellular as well as Mission Critical Push-to-Talk, alongside regular voice communication.

The device features a prominent side PTT key, a rotary control for channel switching or volume adjustment, a front-mounted high-volume speaker, a 13-pin ISM audio connector, and a removable battery. The i.safe MOBILE App World is pre-installed for immediate access to applications.

Advantages:

- Android-based 4G radio combining telephony and Push-to-Talk (PTT) in a single compact device
- Traditional two-way radio layout for an easy transition to the IS380.M1 without changing familiar workflows
- Oversized side PTT button designed for comfortable and reliable operation
- Rotary control for channel switching or volume adjustment, ensuring fast and secure handling
- Front-facing, high-power loudspeaker that enhances voice clarity, especially in loud environments
- 3-pin ISM audio interface supporting a wide range of professional accessories, including headsets for high-noise conditions
- Replaceable battery enabling uninterrupted operational readiness
- Integrated i.safe MOBILE App World, providing access to selected applications for PTT and LWP functionalities
