

# RADIO 5G – IS440.M1

## ZONE M1 EX

The 5G radio ensures secure and failure-free PoC communication via public or campus networks (4G or 5G) or Wi-Fi®. A dedicated gateway makes the IS440.M1 interoperable with previous radio technologies and enables a seamless integration into existing systems. The 5G radio offers a user-orientated look & feel, a replaceable battery, large buttons for PTT, SOS, talkgroup selection, a powerful front speaker, an ISM interface and a functional fixing clip. For the secure integration of different radio technologies and seamless team communication in mining. You can download selected apps that are compatible with the device directly from the pre-installed App World and update them regularly. The App World contains product-related, selected push-to-talk and MDM solutions.

### Advantages:
