

# SCANNER RUGGEAR RG-TH

## INDUSTRY ZONE

To ensure flexible and reliable data capture in industrial environments, the RG530 smartphone is equipped with a specially designed portable barcode scanner. The trigger-activated scanner is ready to use and capable of quickly and efficiently capturing both 1D and 2D barcodes, even when they are dirty or distorted.

The product is available in two variants, enabling short- and long-distance data collection. Thanks to the use of Zebra scanners, the reader is capable of reading codes from a distance of up to 6 meters or 18 meters, depending on the variant selected. In addition, the RG-TH operates in the HID standard, which enables real-time data transfer between the reader and the RG530, supporting the digitization process in the enterprise.

**Advantages:**

- Scanning distance up to 6 m/18 ft
- Batch scanning of stained/deformed barcodes
- Real-time data transmission
- IP68 dust and water resistance Drop resistance

Technical features	
Scanner	MR (mid range) Zebra SE4750 MR (~6 m) ER (extended range) Zebra SE4850 ER (~18 m)
Dimension	Size: 202 x 90,4 x 127 mm Weight: 377,1g
Type of protection	IP68 Military standard MIL-STD 810H
